PLASTIC CASE GAUGES

Our plastic case gauges are corrosion and weather resistant. They can be used in extreme environmental situations such as outdoor use or very wet areas where a standard gauge might rust. These economical gauges are constructed with a plastic case, a plastic lens and all brass internals.

GAUGES

LIQUID (GLYCERIN) FILLED GAUGES

SSC's glycerin filled gauges are good for applications where there is a lot of movement. The liquid inside the gauge acts as a vibration and pulsation damper giving the technician a more accurate read. They are constructed with a stainless steel case, a plastic lens and all brass internals.

DUCK PLUG

When using this product there is no need to drain water below the returns as the double seal system provides a tight seal on all 1 1/2" threaded fittings. The duck bill valve allows a large flow of air and water to be blown from return plumbing, but does not pool water back into the lines. The heavy duty rubber is resistant to anti-freeze and other pool chemicals.
